

# [Arduino] Arduino YUN 重設密碼

30 SEPTEMBER 2015 on Arduino

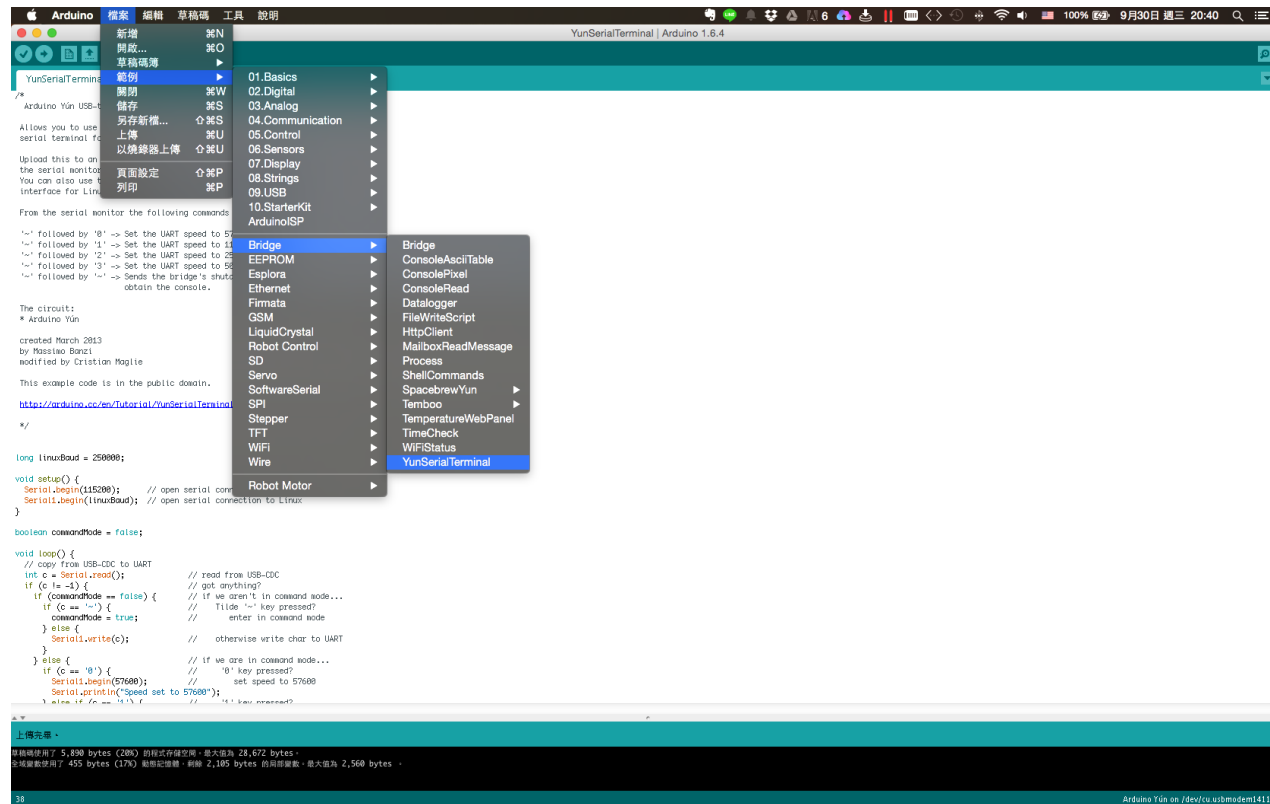

Arduino Yun 使用者常會在第一次設定完密碼後，之後要使用突然忘記自己當初設的密碼，此篇文章主要和大家分享如何快速地重設 Yun 的密碼

## 重設密碼步驟

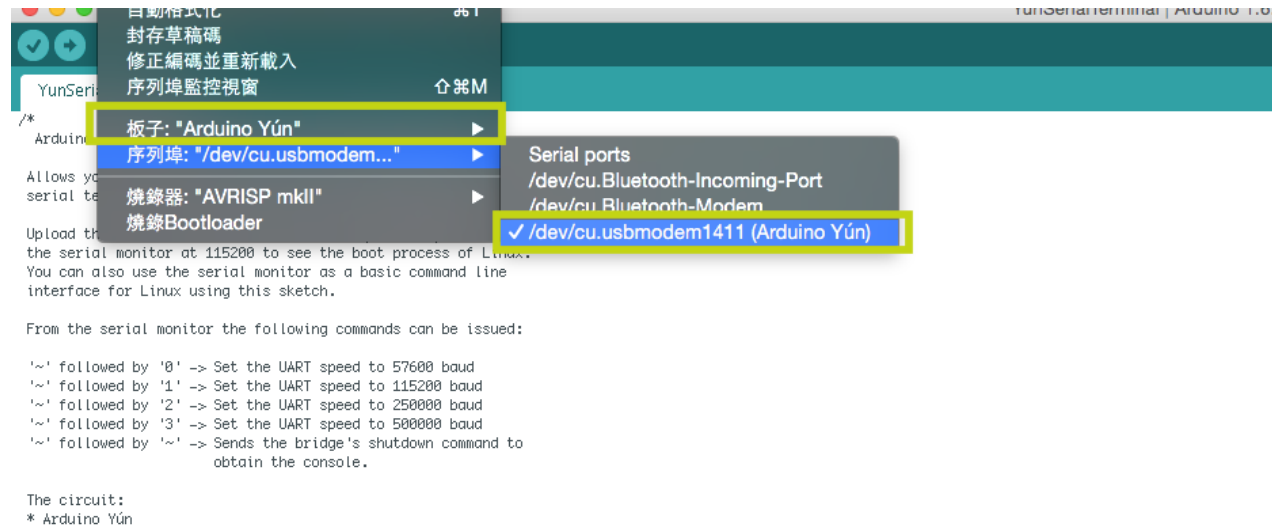

1. 首先將 Yun 連上電腦

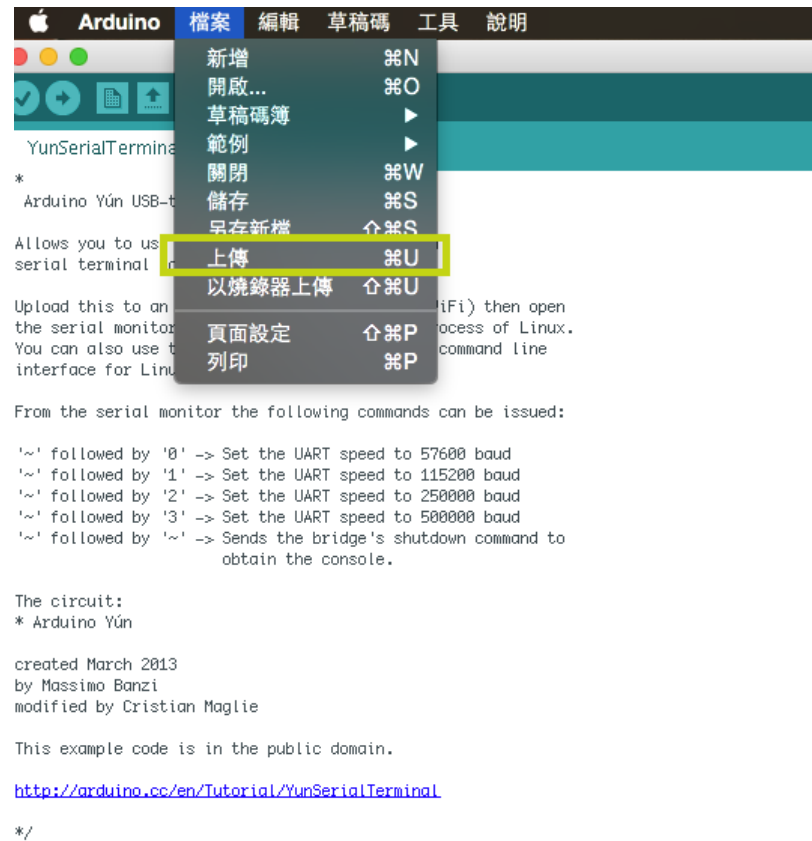

2. 開啟 Arduino IDE 將 `YunSerialTerminal` 範例程式匯入

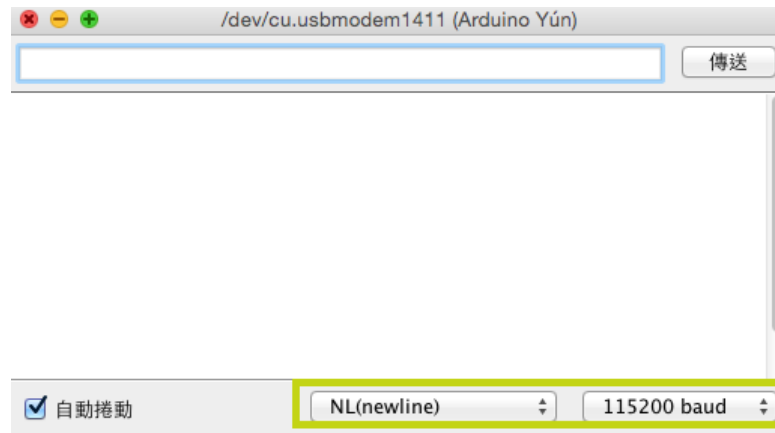

### 3. 確認板子指定以及serial port 正確，將此範例程式上傳至 Yun

#### 4. 開啟Serial monitor然後在右下角選擇newline

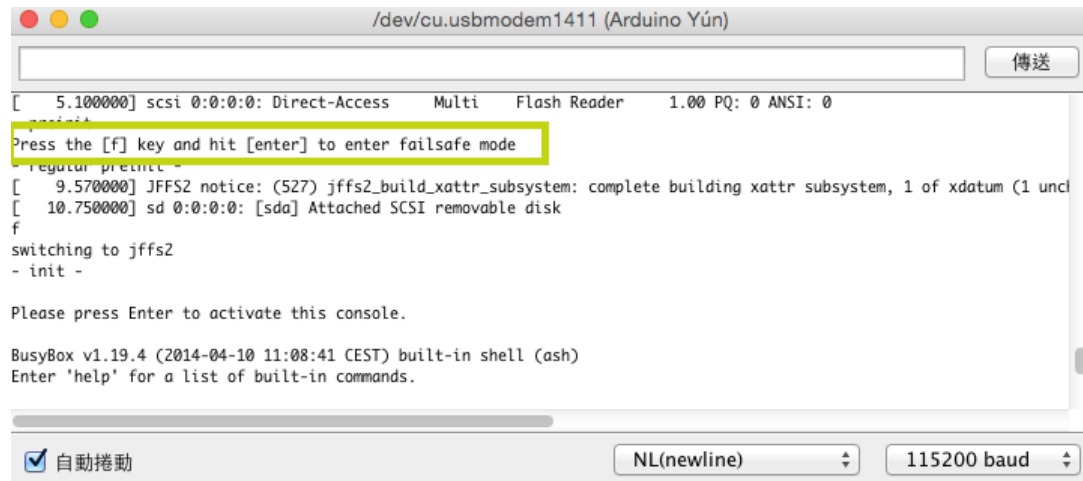

5. 長按 Yun RST button 大約 30 秒後放開，等待 Serial monitor 出現 `Press the [f]` key and hit `[enter]` to enter failsafe mode 訊息，並於輸入欄輸入 `f` 後按傳送

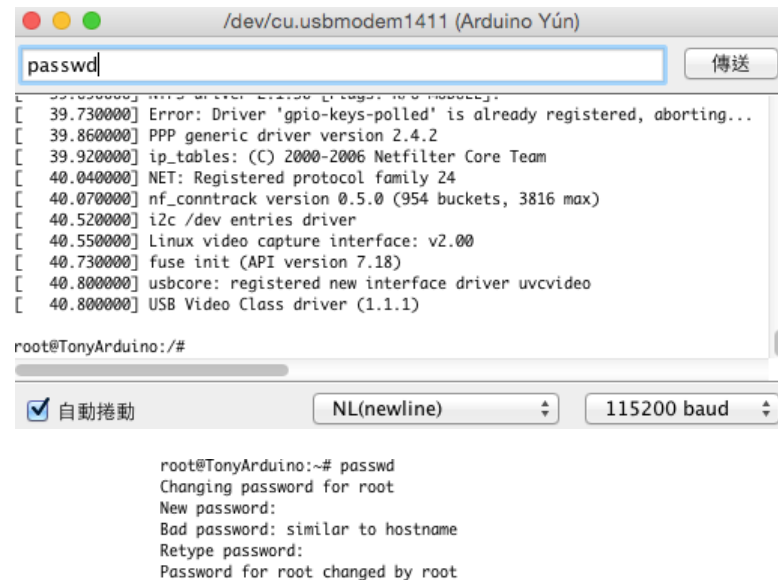

```
/dev/cu.usbmodem1411 (Arduino Yún)
[ 5.100000] scsi 0:0:0:0: Direct-Access Multi Flash Reader 1.00 PQ: 0 ANSI: 0
[ 5.100000] Press the [f] key and hit [enter] to enter failsafe mode
[ 5.100000] regular preinit -
[ 9.570000] JFFS2 notice: (527) jffs2_build_xattr_subsystem: complete building xattr subsystem, 1 of xdatum (1 uncl
[ 10.750000] sd 0:0:0:0: [sda] Attached SCSI removable disk
f
switching to jffs2
- init -

Please press Enter to activate this console.

BusyBox v1.19.4 (2014-04-10 11:08:41 CEST) built-in shell (ash)
Enter 'help' for a list of built-in commands.

[ 自動捲動 ] [ NL(newline) ] [ 115200 baud ]
```

6. 於輸入欄輸入 `passwd` 指令，並重複輸入兩次新的密碼，即完成密碼重置了

```
/dev/cu.usbmodem1411 (Arduino Yún)
passwd
[ 39.730000] Error: Driver 'gpio-keys-pollled' is already registered, aborting...
[ 39.860000] PPP generic driver version 2.4.2
[ 39.920000] ip_tables: (C) 2000-2006 Netfilter Core Team
[ 40.040000] NET: Registered protocol family 24
[ 40.070000] nf_conntrack version 0.5.0 (954 buckets, 3816 max)
[ 40.520000] i2c /dev entries driver
[ 40.550000] Linux video capture interface: v2.00
[ 40.730000] fuse init (API version 7.18)
[ 40.800000] usbcore: registered new interface driver uvcvideo
[ 40.800000] USB Video Class driver (1.1.1)

root@TonyArduino:~#

[ 自動捲動 ] [ NL(newline) ] [ 115200 baud ]

root@TonyArduino:~# passwd
Changing password for root
New password:
Bad password: similar to hostname
Retype password:
Password for root changed by root
```
